SUMMARY

Frontend Engineer with 1 year of professional experience building scalable web and mobile applications using React.js, Next.js, React Native, TypeScript, and modern frontend technologies. Graduated with a Bachelor Degree of Computer Applications (BCA) from Mangalmay Institute of Management & Technology (MIMT), Greater Noida. Experienced in developing responsive user interfaces, integrating APIs, optimizing application performance, and collaborating across the full product development lifecycle.

EDUCATION

Master of Computer Applications (MCA)

Manipal Sikkim University (online) | 2026 - 2028

Bachelor of Computer Applications (BCA)

Mangalmay Institute of Management & Technology (MIMT), Greater Noida | 2023 - 2026

SKILLS

Languages: JavaScript, TypeScript,

Frontend: React.js, Next.js, React Native, Tailwind CSS,

Backend & APIs: REST APIs, tRPC, React Query (TanStack Query)

Tools & Platforms: Git, GitHub, Figma, Expo, Postman

Concepts: Responsive Design, Component-Based Architecture, State Management, API Integration, Performance Optimization

WORK EXPERIENCE

Frontend Engineer

SK Agarwal and Co. | June 2025 – June 2026

- Built and maintained a customer rewards and loyalty platform across web (Next.js) and mobile (React Native), contributing to a unified product experience within a shared monorepo codebase.
- Developed reusable, typed UI component library in React + TypeScript, reducing redundant UI work across 3 product surfaces and improving visual consistency.
- Implemented efficient data-fetching and caching patterns using React Query (TanStack), cutting unnecessary API calls and improving perceived load performance.
- Worked within a monorepo structure, sharing business logic, validators, and component utilities across web and mobile apps — reducing duplication and improving maintainability.
- Collaborated closely with designers, product stakeholders, and backend developers to deliver production-ready features.
- Optimized application performance, resolved bugs, and improved code quality through refactoring and best practices.

PERSONAL PROJECTS

Atoms Note | T3 Stack – Next.js, TypeScript, tRPC, React Query, Drizzle ORM, PostgreSQL

- Built a full-stack educational platform for students to browse notes organized by course, semester, subject, and chapter — with SEO-friendly dynamic routing and metadata management.
- Implemented an admin dashboard for full content lifecycle management — covering courses, semesters, subjects, and chapters — with role-based content workflows.
- Integrated TipTap Editor for rich-text note creation and editing, providing a familiar writing experience with extensible formatting options.
- Developed the application using the T3 Stack (Next.js, TypeScript, tRPC, React Query, and Drizzle ORM) to ensure end-to-end type safety and maintainability.
- Organized the codebase using a monorepo architecture with shared packages, reusable utilities, validators, and UI components.
- Focused on performance optimization, code quality, and scalable architecture throughout the development lifecycle.
